QUISSET WILDLIFE MANAGEMENT AREA

(Blackstone, Mendon)

SIZE: 388 acres of rolling forested upland with some wetland and field habitat. The eastern side of the area is accessible from Providence/Blackstone Street; the northern side from Quisset Hill Road.
U.S.G.S. Quad: Blackstone, Mass. - R.I.

VEGETATION: The area is dominated by second growth mixed hardwood and conifer forest, but there are several areas of field habitat in various stages of succession.

WATER: Hop Brook, a cold water stream containing native trout, forms the western border of this WMA. A small swamp comprises the headwaters of the little brook on the eastern side of the property.

WILDLIFE: Grouse, deer, gray squirrel, fox, turkey and numerous nongame species. This area is **not** stocked with pheasant.

SPECIAL

REGULATIONS: None.
